

The screenshot shows the Ubuntu website's desktop download page. At the top, there is a navigation bar with links for 'Downloads', 'Desktop', 'Server', 'Core', and 'Cloud'. Below the navigation bar, a large section is titled 'Download Ubuntu Desktop' with a sub-section for 'Ubuntu 24.04 LTS'. A prominent orange crown icon is displayed next to the LTS text. To the right of the LTS section, there is a brief description of what LTS means: 'The latest LTS version of Ubuntu, for desktop PCs and laptops. LTS stands for long-term support — which means five years of free security and maintenance updates, extended to 10 years with Ubuntu Pro.' Below this description is a green 'Download 24.04 LTS' button. Further down, there are links for 'What's new', 'System requirements', and 'How to install'. Under 'What's new', two items are listed: 'New Desktop installer with support for autoinstall' and 'New App Center and Firmware Updater applications'. The bottom of the screenshot shows a portion of the Windows taskbar with icons for File Explorer, Mail, and Google Chrome.
